RESPECT THE ELEMENTS

BUYERS' GUIDE 2016

WE KNOW YOUR WORLD.

GILL DIDN'T BEGIN AS A BRAND. OR A BUSINESS.

IT STARTED AS A SOLUTION.

A SOLUTION TO FIND BETTER, MORE CAPABLE CLOTHING.

BECAUSE WE KNOW CAPABILITY CREATES CONFIDENCE.

AND CONFIDENCE CREATES CHAMPIONS.

LIKE YOU, WE'VE LIVED IT.

SO WE GET HOW SERIOUSLY YOU TAKE IT.

WE BELIEVE OUR PRODUCTS DON'T JUST MAKE YOU MORE CONFIDENT.

THEY MAKE AN ENTIRE SPORT BETTER.

WE KNOW YOUR WORLD.

WELCOME TO OURS.

Welcome to the 2016 Buyers' Guide

What's New

The season ahead sees a broad selection of exciting new products and design updates being introduced across the range.

A particular highlight is the Marina Jacket, a first for Gill - an everyday waterproof jacket solution, made using our new 2.5 layer fabric. In addition to this the versatile Inshore Lite range of jackets has been given a colour injection.

Our popular Keel Boat range has been updated with new features including a re-engineered hood and collar, whilst the trousers feature an adjustable fit with the addition of shoulder and waist adjustment, upgraded zipper protection and a tactician pocket. The Dinghy collection has been further developed resulting in our most comprehensive range yet. There is particular focus on neoprene products introducing the Thermoskin and Speedskin ranges. The Thermoskin is designed for cold weather conditions and features zoned thermal insulation. The Speedskin offers a lightweight neoprene clothing system. Both ranges offer excellent wind, water and UV protection and are compatible with the Performance Hiking Pads. Our footwear offer has been further strengthened with a new Competition Boot – using a close-fitting lace up system. The neoprene boots have also benefitted from a design update.

Finally, our comprehensive luggage range has been given a design update as well as introducing a new backpack, all of which use improved fabrics to offer even better durability.

Digital Assets

The Gill Dropbox facility houses all of our digital assets including hi-resolution images, training films, Buyers' Guides and logos for your convenience. From here you can download all of the files you require quickly and easily. We have put together some instructions to assist you, which can be found on Dropbox, but please do not hesitate to contact the marketing team if you have any queries. Gill Dropbox URL: <http://tinyurl.com/kkgsynu>

B2B Website

Our new business 2 business website is now live and can be accessed at www.gillmarineonline.com. From here you can place orders, check stock availability and back orders. You can also download marketing and sales materials and keep up to date with news from the brand. If you do not have an account and require one setting up please contact your Sales Representative.

The OS2 is a truly accomplished performer, designed to handle serious offshore and coastal sailing. It provides year-round weather protection with day-long comfort. It wasn't easy finding ways to improve it, but we eventually managed to add handwarmer pockets with water resistant zips, a state of the art retractable cuff system and contemporary new styling.

Features: • Thin sole design allows you to 'feel' the boat • Glued and blindstitched waterproof seams • Lightweight slip on design • Reinforced instep, toe and heel areas for maximum support and protection

Fabric Composition: • 90% Neoprene, 10% Nylon

A fully waterproof and breathable sailing boot built to meet the exacting needs of Ocean sailors. This exciting design is the end result of an extensive performance-led design process. Using a unique combination of a tough TPU lightweight moulding for the foot bed in conjunction with our breathable laminate membrane we have created the two key factors of complete waterproofness and the comfort of breathability.

PERFORMANCE BREATHABLE BOOT

914_Performance Breathable Boot

Colours/Sizes:

Graphite: 39-47

Technology: • Fully taped, waterproof and breathable membrane technology vents body vapour to keep your feet dry • Non-marking and non-slip outsole with unique repeat design surrounded by deep multi-directional water dispersal channels to prevent aquaplaning

Features: • Lightweight TPU moulding for protection and waterproof integrity • Easy use grab handles • Ankle impact protection • Soft, wicking mesh lining throughout • Removable EVA footbed

915_Performance Race Boot

Colours/Sizes:

Graphite: 39-47

Technology: • Fully taped, waterproof and breathable membrane technology vents body vapour to keep your feet dry • Non-marking and non-slip outsole with unique repeat design surrounded by deep multi-directional water dispersal channels to prevent aquaplaning
Features: • Secure lacing system protected by a fully waterproof internal gusset • Ankle impact protection • Soft, wicking mesh lining throughout • Removable EVA footbed

FOOTWEAR

940_Pro Racer Performance Trainer

Colours/Sizes:

Black: 40-47

Technology: • EVA insole with anti-microbial treatment to reduce odour • Abrasion resistant toe protection that's 100x more durable than standard leather • Dual-density insole with an EVA insert at the heel for extra impact protection • Phylon midsole providing lightweight cushioned support and reduced foot fatigue • Moulded multi-directional water dispersal channels and an 80% contact surface ensures that the grippy compound always stays in contact with the deck

Features: • Non-absorbent, quick-drying construction with an impact absorbing removable insole • Non-marking and non-slip outsole • The integrated lace protector creates a clean look and reduces the chance of snagging

The i2 Base layer is made using Activated Carbon derived from bamboo and can be worn alone as a cooling technical layer or under a shell for thermal insulation. Activated bamboo charcoal is naturally and permanently anti-bacterial. It has an extraordinary microstructure that is highly porous and creates a highly absorptive capacity after carbonisation, and becomes even more effective after activation. i2 BASE LAYER

Sunglasses

Features for all Eyewear

Polarized lenses block the glare produced by light reflecting off the water or bright deck surfaces. This reflected light creates a distracting haze which can be a real issue when you're looking for marker buoys or checking sail trim. Polarizing lenses are made up of a number of functional elements ultra-carefully bonded together to achieve a high-performance optical product. The main element of the sandwich lens construction is the polarizing light filter in the centre. Laminated to both sides of the filter are UV light absorbers. Optically-corrected, shatter-resistant cushion elements are laminated to both sides of the UV absorbers, followed by a unique scratchproof coating applied to the outer surfaces.

Filter category 3 lenses allowing 8-18% light transmission and are useful in bright sunlight, driving and general purpose wear.

UV light absorbers, which block 100% of harmful UVA, UVB, and UVC radiation.

A quality optical lens is used to prevent vision distortion as cheaper lenses bend and misdirect light so that sizes, shapes and even distances can become distorted – leading to eye strain as you're forced to compensate. Our 'optically perfect' lenses are the result of a unique manufacturing process that fine-tunes the lens for clearer, truer vision. As a result, they comply with European Class 1 Optics Standards.

For everyday use in sunny conditions we'd recommend a Dark Smoke colour as this blocks more bright light and doesn't distort colours. The other lens colour offered within the range is Copper which is great for everyday use but has the added benefit of filtering blue light and therefore enhancing reds and greens – useful for sighting buoys against water and bright blue skies.

Designed for life on the water, all Gill sunglasses float. To achieve this our frames are constructed from lightweight materials with closed cell floatation pods. The Edge and Speed styles contain sealed air-chambers within the frame itself. Our new Reflex style uses the latest in floatation technology; an advanced low density polymer with natural buoyancy.

Hydrophobic outer coating sheds water and reduces salt residue for clear vision.

Oleophobic technology applied to the inside face repels fingerprints, sun lotion and skin oils. This is the same technology found on touch-screen devices to reduce finger marks.

PRODUCT CARE

Restores and rejuvenates your garments to their original finish. The range includes an Intensive Spot Cleaner, Wash-in Cleaner and Reproofing Spray. Developed and tested specifically for use on marine garments.

PRODUCT CARE

A001P_Intensive Spot Cleaner (6 pack)

Colours/Sizes:

Size: 75ml

- Technology:** • Concentrated citrus formula • Penetrates deep into the fabric to remove stubborn dirt
- Features:** • Easy and simple to use • Water soluble for easy rinsing
- Penetrates dirt and oils • Use to pre-treat your garment prior to full cleaning

such as oil and grease

A002P_Wash-in Cleaner (6 pack)

Colours/Sizes:

Size: 300ml

Technology: • Contains liquid silver which is proven to kill bacteria and therefore prevent unpleasant odours

Features: • Easy and simple to use • Removes salt and dirt from marine garments • Convenient wash-in application • Silver odour control • Won't remove DWR finishes • Enough for 4 washes

technology for

A003P_Reproofing Spray (6 pack)

Colours/Sizes:

Size: 300ml

Technology: • Can be applied to any fabric to quickly produce a water, oil, salt and stain repellent finish

Features: • Easy and simple to use • Quick drying • Non staining • Reduces 'salting up' • Improve the performance

Will not affect breathability • Oil and stain resistant • Won't change the colour or handle of fabric

of your marine gear •
